### Summary

Full-Stack MERN Developer with hands-on experience in JavaScript, React, Node.js, Express, MongoDB, Docker, Kubernetes, and CI/CD automation. Strong focus on scalable backend development, API engineering, and modern frontend architecture. Dedicated to delivering high-quality software and seamless user experiences.

### Skills

**Languages:** JavaScript, TypeScript

**Technologies & Tools:** ReactJS, NextJS, Prisma, Gsap, Redux, WebSocket, mongodb, NodeJS, ExpressJS, Redis, AWS, S3, Lambda, Kubernetes, CICD, Docker, Argocd

### Experience

#### Full-Stack Developer Intern

1 september 2025 – 15 october 2025

- Developed a full-stack social media application. **complete backend API system using Node.js, Express, Postgresql, and Prisma**, ensuring clean modular architecture and high performance.
- Implemented **post upload and image handling using Multer**, improving upload speed **10x**.
- **Created product management APIs** for an e-commerce platform, supporting product creation, **search, filtering, and inventory handling**.
- Developed an **Add-to-Cart module with quantity updates and automatic subtotal calculation**.
- Integrated **AuthJS**, and **secure API practices** to ensure data safety. **delivered all assigned tasks on time**.

### Projects

#### Event Tamplate Design | [Live Link](#)

Jun 2025 – November 2025

- **Built a dynamic event-template platform** that automated design generation, **50x faster** than manual editing.
- Developed a **secure auth system with rate limiting and OTP-based password reset**, ensuring production-grade user security.
- **Improved performance using lazy loading, dynamic imports, and image compression**, significantly reducing LCP and improving UX.
- Added **pagination and optimized APIs** to reduce backend load and ensure smooth performance under high traffic.
- **Integrated an admin dashboard** for template management and analytics, providing real-time insights and content moderation.
- Built with **Next.js (Turborepo) + Node.js/Express + ImageKit**, ensuring scalable, modular deployment from frontend to backend using **Docker, Kubernetes, Argocd**.

#### Consultancy Site | [Live Link](#)

July 2025

- Recreated a **WordPress website as a pixel-perfect Next.js application**, matching UI and interactions exactly while improving responsiveness and load time.
- Implemented **image optimization, and SEO-friendly rendering**, resulting in smoother performance and faster navigation.

#### Portfolio Template | [Github](#)

August 2025

- **Built a dynamic portfolio website generator** where users fill details like header, footer, about, and projects, which get stored in the database and instantly rendered on their portfolio.
- **Added real-time preview of placed sections** to speed up editing and provide an instant visual result before publishing.

### Awards & Certifications

- **CODE ALPHA INTERNSHIP:** completed 2 tasks on time.

### Education

#### Bachelor of Computer Application

svpm college

Graduated: 2024

CGPA: 8.24 / 10
